## Single Phase Solid State Relay Specification Sheet

This is a range of fixed build, logic fired, zero crossing Solid State Relays. An ideal replacement for contactors due to their enhanced lifetime, these products are robust, reliable and economical. Providing silent operation with no mechanical switching, and offering improved heater life because fast switching reduces the thermal stress on elements.

Single or three phase versions available.

Note: To achieve the full operational range of these devices the HP series must be bulkhead or heat sink mounted. Failure to provide heat dissipation will reduce the effective current rating of the product.
